Directions are given for size 10 with changes for sizes 12 and 14 in parentheses. You will need 8 (10, 12) two ounce balls of Bernat Blarney Spun Yarn; one each of 16 inch circular knitting needles numbers 5 and 8, and one 24 inch circular knitting needle number 8 or any size needle which will work to gauge.

WHEN YOU GIVE LOVE THIS CHRISTMAS...

**you give the most
precious thing there is!**

Christy lives far back in the rugged foothills of Northeast Oklahoma. Hundreds of other American Indian youngsters like her live there too. Here was the end of the "trail of tears" their forefathers traveled more than 100 years ago. But for these children, who live under the most meager circumstances, the tears and the suffering still exist today.

When you assist one of these precious children through New Frontiers of Faith, your love is demonstrated in the most practical way — by helping the child have healthy surroundings... medical care... warm clothing and shoes... religious training... and a fair chance at life. The cost—only pennies a day to sponsor one of these youngsters.

Your child will know who you are and you may exchange letters, snapshots and little gifts. You'll receive a recent photo and brief history of your child. New Frontiers of Faith will provide loving care and genuine family surroundings for this youngster. Above all, NFOF will help your child to know God.

Through sponsorship—even through your generous contribution—you give a needy American Indian child a gift of love this Christmas that lasts all year long.

Will you help 2-yr.-old Christy? Deserted by her father, this precious Indian child urgently needs clothing, shoes, more nourishing food. She also needs your love. Write Today!

around, about $\frac{1}{8}$ inch from all top edges, matching corners and seams. Blind-stitch into place and remove bastings. Fold top bands in half on

Birds of Felt

In flocks, pairs or singly, the presence of these cheery fellows is vividly felt all winter. Use them to enhance your flower and house plant arrangements. But do let some of them fly to your church bazaar or to children you know. When accurately marked and colored, these sets of birds are actually educational toys that teach bird identification.

Materials Needed: Felt scraps in colors yellow, raspberry pink, orange and blue; matching thread; nylon hose (cut in narrow rings) or foam rubber for stuffing; clear drying glue and acrylic or poster paint in colors red, black and white.

Patterns: Make pattern by enlarging chart. Each square equals $\frac{1}{2}$ inch. Draw into each square that portion of design which appears

in corresponding square of chart.

White Wing Crossbill: Cut black wings, body pieces of raspberry pink. Paint eyes, tail and beak black. Paint white on wings same as solid lines shown on pattern.

Goldfinch: Cut black wings, yellow body. Paint eyes and tail black. Paint head black above dotted line on pattern. Paint wings with white according to dotted lines. Add several white $\frac{1}{4}$ -inch long horizontal brush strokes to tail.

Bluebird: Cut white underside, blue wings and body. Paint beak and eyes black. After sewing, paint with red on underside piece to within one inch of tail. Extend red onto body pieces as far as dotted lines indicate.

Oriole: Cut black wings and orange body. With black, paint head and upper body above broken line. Paint black within broken lines on tail. With white, paint eyes and make brush strokes on wings as shown.

Sewing Method—(same for all birds): With wrong sides together, join two body pieces using overcast stitch along back, from just in front of tail to top of beak. Make running stitches behind beak (so beak stays open) and three overcast stitches on breast. Inserting underside piece, continue with overcast stitch, join along one edge to tail (tail stays open). Stuff with hose circles or foam. Sew other side. Glue on wings. Attach thread loop to head for hanger.

Sit back and relax while Niagara Cyclo-Massage helps **Melt Away Minor Aches, Pains, Everyday Tensions in Minutes**

by Arthur Godfrey

When I tell you about the results you can expect from Niagara Cyclo-Massage, I am speaking from personal experience.

I've been using it for more than 7 years.

You've got to feel it to believe it

Nervous fatigue, tension, minor muscle aches and pains literally melt away while you just sit back and relax. That's what happens when Niagara's amazing Thermo-Cyclopad® goes to work with its unique combination of soothing heat and gentle, penetrating massage.

By using Niagara Cyclo-Massage daily, I find that my work load seems lighter. I sleep better, and fall asleep more quickly. It's a marvelous relaxer. It increases my blood circulation, too.

As you know, I've got two pretty badly banged-up legs which hurt a good deal of the time. And while Niagara Cyclo-Massage can't cure, it certainly helps to ease them. I'm told it also helps folks who suffer from the minor pains of Arthritis and Rheumatism, whenever they occur.

If you would like more information, just mail the post-paid card to me c/o Niagara. You'll receive by mail an illustrated 16-page color book, without obligation.

Listen to Arthur Godfrey Time — CBS Radio Network

How to Transfer Designs

A bouquet of flowers comes to you in this month's transfer patterns. Your embroidery floss or textile paints will bring them into full blossom for your own pleasure or for lovely gifts. In a future issue you will receive flower transfers for July through December.

In using an iron to transfer design to material, make a test first to determine proper heat and time required. First, heat iron very hot but safely below scorching. Next, cut a small test design and place it (red side down) on material. Protect fabric by placing tissue paper, brown wrapping paper or a press cloth over design. Then press, moving iron constantly over surface to distribute heat evenly. If iron is at proper temperature, several seconds are required; if not hot enough, it may take a minute or more to get a good stamping. The stamping comes off SLOWLY and is faint at first. Press until as clear as desired.

When test results are satisfactory, cut out desired design and pin or baste in place, proceeding as described above. Additional stampings come off more quickly if made before pattern cools off.

These designs may also be traced onto fabric by using carbon paper, a tracing wheel, or by rubbing stamping wax over perforations left by an unthreaded sewing machine.

When choosing your paints or embroidery colors, consider clues from nature. For a delicate looking carnation, use three or four shades of a color for the flower. Jonquil petal tips can be light as from sunlight and darker at base as in shadow. Dainty sweet pea is best portrayed if tendrils are pale green. The same color in heart of open flower enhances violet. Rose seems in full beauty when nearest petals are worked in light color and are shaded gradually to base. Veining should be darker than leaves but not contrast greatly.

(Continued on Page 31)

How to Transfer

(Continued from Page 26)

Lily-of-the-valley is winsome with fold-over part of leaf worked in light shade.

Coordinating material, color and stitch or stroke will give overall appearance you desire. Use solid painting or stitches such as long and short and satin for filled-in work. This is more appropriate on heavy materials such as canvas, linen, huck toweling and wool. Outline strokes or stitches are more suitable for lightweight fabrics such as percale, cotton and organdy.

For an unusual and striking effect, work flowers entirely in white on solid color fabric. Other possibilities include brown on natural colors or flowers of a light shade on background in darker shade of same color.

Luncheon cloths and napkins would be lovely using one flower repeated. The hostess who has an abundance of a certain flower growing in her yard might choose that flower with her centerpiece-at-hand in mind.

Place mat sets with each place mat and napkin in one flower would surely be a conversation piece as well as an attractive table setting when guests notice each has own flower.

The many flowers are well suited for combining on one tablecloth, quilt or in sets of pictures, guest or tea towels. Handkerchiefs, pan holders, curtains and aprons

are other useful items to decorate. Bed linens might be worked with border design on sheet and flowers on pillow slips.

Border design is well coordinated with all the flowers or for use by itself. Color photographs of butterflies can be most inspirational in choosing colors for working border transfer.

Flowers by month personalize these designs for remembering birthdays, anniversaries and other occasions. Decorate a clothing or household item and use the same kind of flower, fresh or artificial, to decorate package. Greeting cards can also be made from these transfers and colored with pencils, crayons or water colors.

FLOWER and GARDEN

Blossoms on my African violet cup up too much to be pretty and leaves almost double together in center. Is anything wrong that can be corrected? Mrs. R. G., Tenn.

Some kinds grow this way naturally, but you may have thrip or cyclamen mite. Ask local Saintpaulia authority to visit your plants and check them as these are hard to identify. Use selinimum (available at garden shops) in soil if plants are infested.

Does copper plant have another name? How should it be cared for? Mrs. P. M., Tex.

You may mean copper leaf plant, *Acalypha wilkesiana macafeana*. Grow in sunny cool window with high humidity as possible and keep soil evenly moist. Plant in equal parts loam, sand and brown peat moss with a pinch of superphosphate per pot.

Please give information on care of date palm grown from seed. It has 3 leaves, one about 20 inches, others brown off. Mrs. H. B., Ont., Can.

Plant in small pot using equal parts loam, sand and leaf mold. These want no fertilizer. Keep evenly damp and grow in bright east window. Mist fronds with tepid water each morning.

How can a new plant be started from aphelandra? Mrs. G. O., Gt. B.

Use sharp razor to cut stem in pieces with 3 joints each. Dip lower end of each in rooting hormone as Rootone, plant 2 inches deep in perlite or other porous rooting medium, keep barely damp below, mist leaves daily with tepid water and keep covered with clear plastic. Place in bright east window. Room temperature should be 75° F. (24° C.). Mild bottom heat helps.

What is correct care for rainbow fern which I have growing in my terrarium? Mrs. J.P., Ala.

There is no such thing as rainbow fern, but grow all terrarium ferns in bright north light in damp leaf mold with trace of loam, sand and charcoal added. Rattlesnake-plantain (variegated leaves) grows same way and probably is your plant.

After blooming, should hydrangea be re-potted or taken outdoors? A. E., Ill.

House plant hydrangeas are kept potted. Cut spent stalks to one joint, tease old soil away from roots and re-pot in equal parts loam, sand and peat moss with a pinch of superphosphate per pot. As new shoots appear, plunge pots in sunny border and keep quite moist. Thin new shoots to 1/2 dozen strong ones. Use foliar fertilizer every 3 weeks. Bring in before frost and place in cold sunny window.

How should I care for and transplant a zebra plant? I. S., Ohio

Use equal parts loam, sand and peat moss; pot up main plant and off shoots and keep on dry side in bright light, average room temperature and humidity. A little house plant fertilizer in early spring helps.

Please tell me how to grow larger fruit on my orange tree. It bears apricot-size fruit. Mrs. J. B., Mo.

Sounds like a calamondin orange, and they get no larger. But get a grafted, tubbed navel or Valencia orange and fruit will grow to large size if properly cared for. Grow in bright light, cool room, keep pot evenly moist and spray foliage with tepid water morning and noon.

My carnation plant is large and pot bound and has not bloomed for four years. How do I get blooms? Mrs. G. S., Minn.

Knock from pot, pull crowns apart and re-pot individually in smaller pots with equal parts loam, sand and leaf mold. Water once, then no more until "stems" feel soft. Water sparingly through winter, grow in sunny cool window, water more in summer.

How often do cyclamen plants bloom and how should they be cared for? Mrs. H. H., Ind.

Florist's kinds bloom once in late winter or early spring. Grow at 70° or lower in bright east window and keep damp while flowering. Then dry out, move to cold room, north light and water enough to keep tuber from shriveling. Re-pot in September in equal parts loam, sand, peat moss and leaf mold. Water gradually until growth is active. Feed house plant food when new growth is well out.

Garden questions are answered each month by Dr. John P. Baumgardt only in pages of The WORKBASKET, none answered through mail.

Make Poinsettia Last Longer

Betty Brinhart

Hundreds of beautiful poinsettias will be received by loved ones during this holiday season. Unfortunately, many will be thrown away. With a little effort and some understanding of cultural requirements, anyone can prolong present beauty of poinsettia; also have three times as many flowering on windowsill next year.

Poinsettias do well in a tropical atmosphere much like that found in our modern homes where temperatures remain around 70 degrees throughout winter months.

Plant should be placed in a warm, south window. If top soil appears dry, place pot in saucer of warm water for several hours. Do not over-water poinsettia. Remember that it is native to a hot, semi-dry climate. Do not water until soil is good and dry. Should soil become waterlogged, it will instantly begin to drop its leaves until nothing remains but naked branches topped by true flowers. Give it at least 3 hours of direct sunlight each day if possible, before allowing it to go dormant.

High humidity is another aid in

preserving beauty of plant. If air in house is too dry, place pot on glass marbles or an overturned saucer above water level in shallow tray. It could be placed among several house plants in window garden.

True flowers are tiny chartreuse, cup-like nobs that are oozing with nectar. These cup-like blooms are last to go after flower enters dormancy. Instead of throwing leafless plant away, stop watering, then store in cool place until spring.

In mid-May bring plant out of storage. Cut stems back $\frac{1}{3}$ their original height, place pot in water until soil becomes moist. Plant should then be placed back in warm south window where growth will soon begin.

After danger of frost is past, harden foliage off gradually, sink pot in sunny, but well-protected spot in garden where it can grow throughout summer months.

Plant will produce sturdy cuttings by mid-August, if watered deeply and fed with a liquid plant food once a week.

Cuttings produce excellent plants that flower well by Christmas. Take 5-inch cuttings in August and singe each base with a flaming match to coagulate sap. Dip these ends into rooting powder and plant in 4-inch deep flat of sharp sand.

In 4 weeks, when cuttings are well rooted, transplant into pots. Use moderately fertile potting soil and set 3 rooted cuttings in each 8-inch clay pot for mass color. Provide shade for 2 days, then allow to grow in full sun until nights begin to turn colder, then return to a south window.

After October first, cover plants at night with newspaper or return to a dark place. Short days cause them to flower for the holidays and produce excellent plants.

A Tree Of Everlasting Gingerbread Men

Youngsters are always delighted to have a special little Christmas tree of their own, and, of course, they will be twice as pleased with one in which they have shared in creating decorations. Certain to capture fancy of children, as well as the spirit of holidays, is a bare branch tree (or small evergreen) hung with a bevy of everlasting gingerbread men.

Make gingerbread men from heavy brown cardboard, using cookie cutter for pattern. Trace outline with pencil. Use heavy-duty household shears or hobby knife to cut out design.

Once blank cut-outs are prepared, it's time for budding young artists to take over with brushes, poster paints and imagination. Putting on facial features and clothing ginger-

bread men will provide many hours of creative, enjoyable fun for children.

After one side of each cut-out has been given its face and attire, let paint dry thoroughly and decorate reverse surface. Figures can be made identical on both sides or completely different.

Use needle and coarse thread to attach hanging loops to top of heads. The "tree" shown is a leafless branch that was sprayed white. When dry, trunk was forced into an all-metal, spiked flower frog. Then placed in foil-covered flower pot. To insure stability, pot was filled to within an inch of top with colored landscape gravel. (Plain gravel or dry sand can be used for this purpose.)

10½ inches from back edge of heel tab.

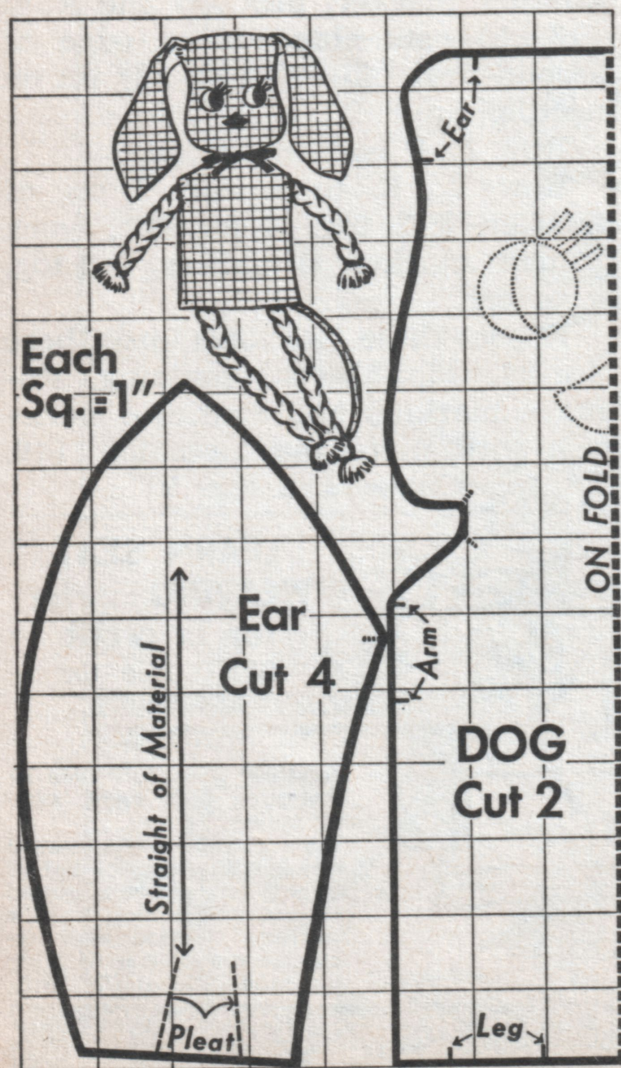

Dec 1 st each side every other row 8 (9, 9) times. Bind off remaining 10 sts.

Finishing: Sew heel and cuff seam on wrong side from sole edge to top. Block seam lightly before sewing onto sole. Pin sock to sole by pinning in and out through holes along edge, matching center front and back. Be sure to get sock low enough into sole to give firmness when sewing. Starting at center back, with a long strand of yarn, bring needle

through sock halfway between 2 holes, then out through next hole all the way around. Reverse and work in opposite direction, by bringing needle through hole and out again between 2 holes, thus forming cross-stitches. You can also use a blanket stitch to attach socks to soles or crochet sock into place, using a number 1 steel crochet hook and making 2 loose sc in every hole around with a ch 1 after each 2 sc.

Do not dry clean slipper socks, but wash like any fine woolen in warm water and mild soap. Dry away from direct heat and stuff lightly with paper.

space between legs which is used for stuffing. Clip at short dotted lines indicated on diagram and at any other point necessary to make a smooth seam after turning right side out. With right sides of one gingham and one plain ear together sew $\frac{1}{4}$ -inch seam. Clip. Turn right sides out. Fold pleat on each ear as indicated on pattern. Sew in place on head where shown on pattern.

Stuff animal leaving openings for arms and legs. Whipstitch to close center 2-inch opening between legs.

Make second ear but with gingham and plain material in opposite positions (pair).

Open skein of rug yarn to point where it is tied. Pull entire skein to full length (about 24 inches) from tied point to opposite end. Measure 10 inches from tied point on skein. Cut through entire skein

at this 10 inch measurement. This gives you two groups of yarn—one 20 inches long and one 28 inches long. Divide these two groups of yarn into 4 groups of equal number of strands. Fold these 4 groups of yarn in half, tie in center and braid to form 2 arms from short length and 2 legs from longer length. Tie with yarn about 2 inches from end.

Place arms and legs in place as indicated and fasten securely with tiny stitches at front and back.

Cut a tail piece from matching material $1\frac{1}{4} \times 14$ inches. With right sides together, stitch $\frac{1}{4}$ -inch seam. Turn, stuff and sew to lower center back.

Cut eyes (black and white) and nose (red) from felt (suggested size and shape indicated by dotted lines on face). Whipstitch in place.

Tie ribbon in a bow at neck. Tie black yarn bows at each wrist and each ankle.
